PROFESSIONAL EXPERIENCE

PROJECT MANAGER

Oct 25 – Present

xData, Geospatial Team, Home Team Science and Technology Agency (HTX)

- Led the complete migration of SPF Enterprise Geographical Information System (EGIS) onto HTX's Nutanix Platform and re-architected it to make it suitable for containerization. This involved liaising with local/overseas stakeholders to ensure all data and external system interfaces which EGIS provides mapping services to are soundly tested and viable on the new platform and subsequently coordinating the onboarding of users over.
- Provided integral support in the integration of ESRI ArcGIS portal product with SPF's crowd monitoring system as well as video management system (VMS) which played a critical role in the management of vehicular and human traffic during key events such as F1 and NDP.
- Assisted the team in other geospatial related product matters such as the introduction of Digital Twins, making full use of ESRI ArcGIS's 3D capabilities, as well as the exploration of other ESRI products such as ArcGIS Mission and ArcGIS Field maps.

PROJECT MANAGER / PRODUCT MANAGER

May 23 – Oct 25

Public Safety and Security, ST Engineering Mission Software and Services Pte Ltd

- Managed turnkey and maintenance projects with the largest project having a contract value of upwards of \$50 million SGD. This involved managing the project's scope, budget/finances, manpower, procurement/logistics as well as both external and internal stakeholders.
- Coordinated the development, testing and deployment of the department's main proprietary product marketed globally worth upwards of \$10 million SGD, as well as other products.
- These products and projects involved integration of multiple systems with GCC and expertise in various technologies from Azure cloud to VMware requiring knowledge of MySQL, Microsoft AD, ESRI ArcGIS, network architecture for a HA setup with load balancing, etc.

PROJECT MANAGER

Sep 22 – Apr 23

Consultation and Collaboration Officer, Trusted Hub Limited

- Managed projects from presales until production and completion along with internal firm audits, crisis management and business continuity planning.
- Led the iterative development of a service management platform for the company through cycles of SDLC using the Angular framework and Agile methodology.
- Took proactive measures to optimize project workflows through Microsoft suite, automating manual tasks and resolving critical mistakes that resulted in substantial monthly revenue loss.
